## **FLAMESHIELD**

# Argo Weld

## Purge Bag Sets

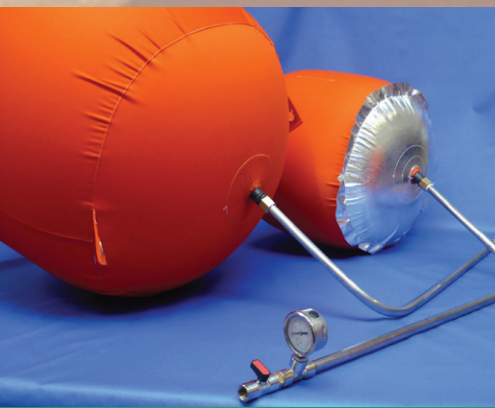

### 2" - 120"

Proban Cotton spark retardant material to suit temperatures in excess of 100°C

Also available with : Carbon X, Nomex, Kevlar & Aluminised Glass

Argo Weld Purge Systems are always manufactured to customers requirements considering the application, pipe environment & flow rates required

#### Typical Argo Weld Purge Systems:

##### Manual Deployment

Flameshield Stoppers with Stainless Steel 'L' shaped tube, Valve, Gauge & Conical shaped rubber Stopper

##### Heat Protected Systems

Allow the Argo Weld systems to be used in applications where the pipes are preheated to 350+ Deg C

##### Pig Out Systems

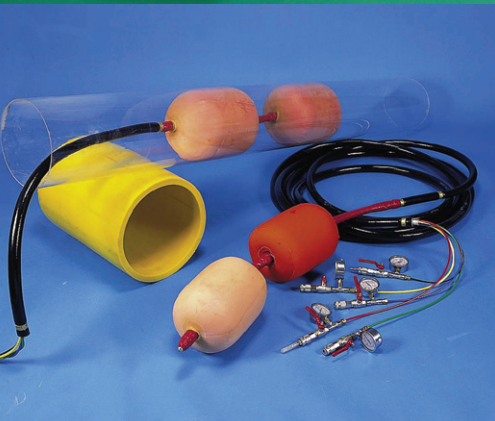

Flameshield Pipe Welding Bags with Zero Metallic's to avoid damage to Pipeline Filters when the Bag systems are 'Pigged Out'

##### Twin Bag Safety Seal Systems

To guarantee a pipe seal and prevent dangerous gases entering the weld area by using two bags and pressurising the interspace with inert gas. Firesleave can be used to protect inflation umbilicals running past the weld joint

##### Ultra Twin Bag Systems

Single Entry Multi Service Bag Sets with Latex Outer Skins to Maximise Seal

Precision Manufacturing

All bags individually pressure tested & packed

MANUFACTURERS OF UNDER PRESSURE PNEUMATIC PIPE STOPPERS & FITTINGS FOR GAS, OIL, WATER & ENVIRONMENT
